Leveraging Al and Human Insights in Email Security

www.ironscales.com

Phishing remains the top threat vector in enterprises and is expected to increase in velocity, volume, and variety. Traditional email security tools like Secure Email Gateways (SEGs) can't keep up with today's advanced threats. And unfortunately, detecting and remediating threats is time-consuming and manual, and building an effective awareness culture is challenging.

IRONSCALES is the leading cloud email security platform for the enterprise and the industry's only solution that uses AI and human insights (HI) to stop advanced phishing. Its award-winning, self-learning platform continuously detects and remediates attacks like BEC, ATO, and VIP impersonation that bypass traditional security solutions. Powerful, simple, and adaptive, IRONSCALES helps enterprises reduce risk, boost security team efficiency, and increase cybersecurity awareness.

Powerful protection Address 100% of the phishing problem in one single platform

Simple efficiency

Reduce the amount of time needed to fight phishing by up to 90%

Adapt to emerging threats

Reinforce AI with real-time human insights to guard against emerging phishing threats

Leveraging AI and Human Insights in Email Security

www.ironscales.com

The Industry's Only Email Security **Platform Combining AI and** Human Insights

Over 10,000 customers are protecting their organizations from advanced phishing threats by:

- Reducing the effort to detect and remediate phishing threats using Al-powered phishing protection that automatically detects and quarantines polymorphic attacks across the entire organization
- Analyzing communications to create a social graph for each user to understand the writing style and who they communicate with
- Automatically grouping and remediating similar threats across your entire organization to address polymorphic attacks

Human Insights

- Ensuring that employees are a strong line of defense with access to more than 100 different security awareness training video
- Regularly testing employee's security awareness by guickly launching prebuilt recommended phishing simulation testing campaigns based on seasonal trends, current threats, and more
- Reinforcing awareness by alerting employees of potential threats with dynamic, straightforward email banners
- Empowering employees to participate in the fight against phishing with the ability to report suspicious messages using Report Phishing Button quickly
- Viewing how security peers have classified a suspicious email in using IRONSCALES to help make informed decisions

IRONSCALES Security Solutions

Starter™

The FREE Starter[™] plan is ideal for small to medium organizations who want to add Phishing Simulation Testing and Threat Management to their security stack

Email Protect[™]

The Email Protect[™] Plan is Perfect for organizations looking for an anti-phishing solution to protect their cloud-based email from threats like BEC, ransomware, and more

Complete Protect[™]

The Complete Protect[™] plan is our most comprehensive email security solution and includes ATO protection, Microsoft Teams[®] protection, and Security Awareness Training (SAT)
