

# The IRONSCALES™ Difference

## Cloud Email Security with Advanced Threat Protection.

Protect your organization's inboxes from advanced phishing attacks, including those that bypass existing security controls, with the only technology that combines AI and human insights.

The phishing landscape is morphing rapidly. Cybercriminals are devising various attacks leveraging new tactics and technology to evade traditional, rule-based email security solutions and static-AI phishing detection tools. These tactics not only result in an increase in phishing threats but also create a lot of distraction for the security teams remediating the threats.

The IRONSCALES™ platform stops the most elusive BEC, ATO, and VIP attacks that breach perimeter defenses including native cloud-hosted email security controls. By combining AI and human insights from every mailbox user and 20,000+ analysts across the IRONSCALES network of global admins, IRONSCALES protects your organization where it matters most—in your user's inbox.

## Gain Triple Threat Protection With IRONSCALES

- Advanced Threat Intel (+ Computer Vision)
- Anomaly Detection (Behavioral + Intent Signals)
- Real-Time Threat Hunting (SOC Community Signals, 20K+)

## Unleash the Power of AI and Human Insights with IRONSCALES™

### Artificial Intelligence

-  Advanced Threat Protection
-  Continuous Behavior Analysis
-  Automated Inbound Email Scanning
-  Automated Incident Response
-  Fake Login Page Protection
-  Account Takeover Protection
-  Microsoft® Teams Security

### Human Insights

-  Report Phishing Buttons
-  Crowdsourced Threat Intel
-  Inline Email Alert Banners
-  Phishing Simulation Testing
-  Security Awareness Training (SAT)
-  Reporting Console

## Protect

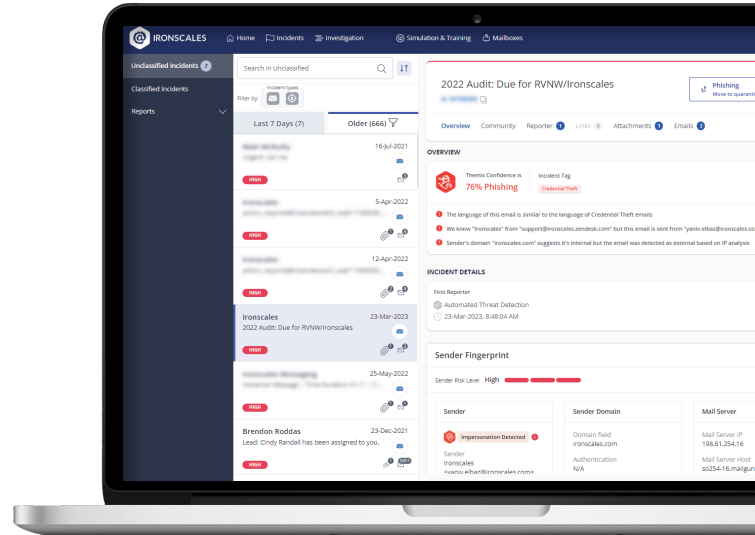

### GAIN UNRIVALED PROTECTION

Address advanced email attacks that evade your defenses and reach inboxes

Leverage a powerful combination of AI/ML, natural language processing, human intelligence, and community insights to automatically discover, alert, and remediate advanced phishing threats like malware, business email compromise (BEC), ransomware, and credential theft, that get past your existing security layers.

Unlike static AI systems, the IRONSCALES platform harnesses the power of both self-learning and adaptive AI/ML to continuously improve its performance to enable you to:

- Leverage adaptive, self-learning AI language models to automatically remediate advanced and emerging email threats
- Analyze behavior to establish baselines, create social graphs, and identify anomalies and threats
- Discover and analyze identity and inbox data for informed decision-making
- Continuously analyze email content, payloads, and intent

## Empower

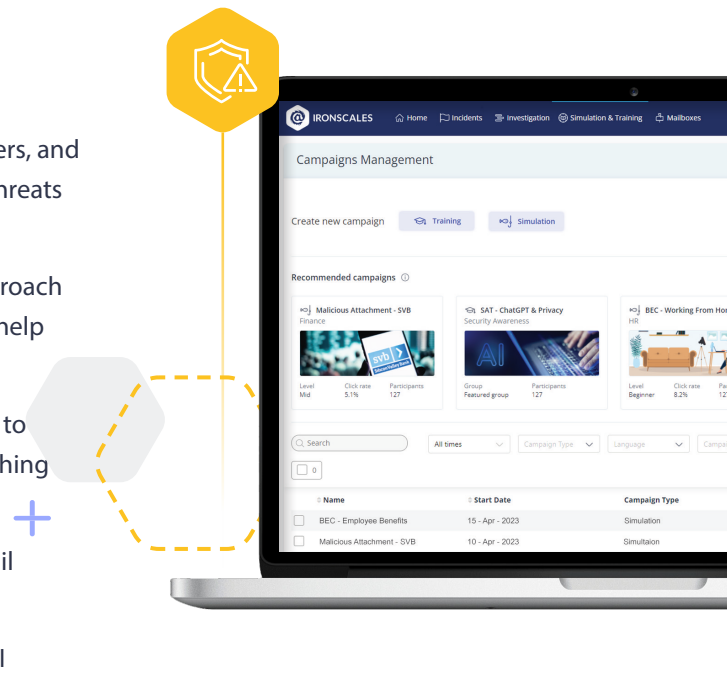

### ESTABLISH AN AWARENESS CULTURE

Mobilize your users as a crucial line of defense

Effortlessly incorporate phishing simulation testing, dynamic email banners, and further reduce risks and increase your employee's grasp of the phishing threats that they are vulnerable to.

Unlike other AI-only solutions, our platform delivers a human-centric approach to keep you in the loop and empowers you to challenge AI outcomes, to help you:

- Closed the skill gap by launching relevant phishing training and testing to users based on risk level, department, compliance needs, results of phishing simulation test and more to create a security aware culture
- Alert employees of potential threats with dynamic, straightforward email banners
- Enrich the ML model with human insights to strengthen personalized AI protection

## Simplify

### REDUCE SECURITY COSTS AND EFFORT

Slash time you spend on email security by 95%

Reduce the effort to detect and remediate phishing threats using AI-powered phishing protection that automatically detects and quarantines polymorphic threats.

Unlike traditional and AI-only email security solutions, IRONSCALES offers dynamic automation so you can:

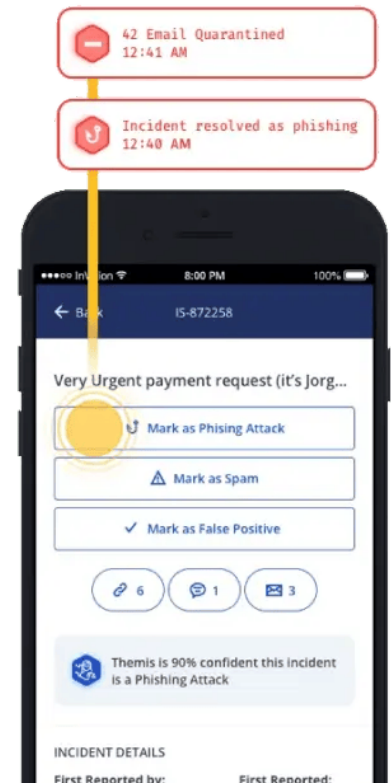

- Automatically group and remediate email threats across your organization based on similar characteristics in one-click
- Charter your own email security strategy with the ability to use Themis as a co-pilot or go fully automated with granular controls
- Make time-sensitive decisions and remediate incidents immediately using the IRONSCALES mobile app

Quickly see what threats are lurking in your O365 mailbox with our 90-day threat scan back

Our free 90-day scan back automatically reviews your Microsoft Office 365 email environment and quickly identifies malware, BEC, phishing, ATO, and other phishing threats that were missed by your SEG.
